lug-style
strap connection

OP/TECH USA'S **SYSTEM CONNECTORS™ – TINY-MIGHTY SWIVEL** *An innovative solution for attaching your camera with a secure swivel attachment!*

OP/TECH USA introduces an innovative new camera strap connector that allows for ultra-fast application and removal from the camera – all while keeping the strap from becoming twisted with its smooth and secure swivel feature!

The **SYSTEM CONNECTORS–TINY-MIGHTY SWIVEL™** is a kit that offers quick connection options for lug-style or slot-style strap mounts. For slot-style mounts, there's a pair of our **ADAPT-ITS™** connectors which would be applied to the camera first before attaching the **TINY-MIGHTY SWIVEL™**. For lug-style, there's a pair of split rings along with leather washers to help protect the camera's finish that are applied first to the camera. The real advantage to these small connectors is the swivel system. It's tested to weights in excess of 100 pounds! These durable connectors are up to the challenge of carrying even the heaviest of cameras and lenses while their swivel action keeps straps from becoming twisted.

When you want to remove the strap, a quick squeeze and release will remove the connector and strap completely so they are out of the way of the camera's controls. This is ideal for photographers doing tripod work where they want as little as possible still attached to the camera. The **SYSTEM CONNECTORS–TINY-MIGHTY SWIVEL™** is sure to become a favorite and trusted part of your gear.

OP/TECH USA continues to innovate quality products to meet the ever-changing needs of the avid photographer and outdoor enthusiast. We feel you deserve the very best! For more information about our products, please call 800-251-7815, e-mail info@optechusa.com or visit us online at www.optechusa.com.
