PRESS RELEASE  
FOR IMMEDIATE RELEASE

Convenient Security Slide

### **MIRRORLESS WRIST STRAP** – *Comfortable security for your smaller cameras.*

The **MIRRORLESS WRIST STRAP** is the perfect solution for carrying cameras that are larger than a point-and-shoot camera but smaller than a full-size SLR. The pad is made from soft yet durable neoprene with a slide that tightens the strap snugly around the wrist for security and comfort. This keeps the camera always at the ready and close in your grip. It also gives you the added peace of mind that if you need your hands free, you can simply let go of the camera and it's securely attached around your wrist. Keeping gear conveniently at hand while also guarding its security is a must for the active photographer on the go!

For added convenience and versatility, the **MIRRORLESS WRIST STRAP** features a **MINI LOOP QD CONNECTOR™**. The connector attaches to the camera with 1.5 mm cord loop to fit even the tightest camera connection area. It's merely put through the camera connection area and then the small quick disconnect is passed through the open loop and then reattached to the main strap. The strap can be easily removed at the quick disconnect leaving the small loop attachment on the camera so that it can be compactly stored away in a small pouch or pocket. The strap measures approximately 11" long to fit virtually any size wrist and can be made as small as needed with the security slide. It's washable and available in black, royal blue, steel, and forest green. Discover just how comfortable carrying a camera can be with OP/TECH USA's exclusive **MIRRORLESS WRIST STRAP**.
