PRESS RELEASE  
FOR IMMEDIATE RELEASE

Performance Sling™ -Right

Performance Sling™ -Left

New! Performance Sling™ -Double Grip (Available in black only)

***NEW VERSION! PERFORMANCE SLING™*** has expanded the family to include the Double Grip Version. It works on both the right and left shoulder to make your rifle or shotgun feel 50% lighter and 100% more comfortable!

OP/TECH USA incorporates a patented comfort-stretch system into the ideal sling, the **PERFORMANCE SLING™**. The neoprene material effectively conforms to the contours of your shoulder while evenly distributing the weight. The internal control-stretch system absorbs the shock of your movements normally felt in your shoulder and back. A non-skid surface effectively grips to your shoulder and also provides extra security when wrapped around the arm to better stabilize the firearm when shooting. The sling offers a large adjustability range (22" - 52" or 55,9 - 132,1 cm) so that it can be customized just for you. It is available in both right-hand and left-hand versions, as well as the Double Grip version which features a black non-skid surface on both sides of the pad. This allows the sling to be worn on either shoulder. The contoured **PERFORMANCE SLING™** is a "must have" for the avid sportsman spending long hours in the field. It can make all the difference! **PERFORMANCE SLING™** is 100% made in the U.S.A. and carries a lifetime warranty. The right-handed and left-handed versions are available in Black and Nature. The Double Grip version is available in black only.

OP/TECH USA continues to innovate quality products to meet the ever-changing needs of the avid photographer and outdoor enthusiast. We proudly make our products in the USA using top-quality materials as we feel you deserve the very best!
