PRESS RELEASE
FOR IMMEDIATE RELEASE

RIFLE NEO SKIN™

***RIFLE NEO SKIN™** carries and protects your firearm with comfort!*

The **RIFLE NEO SKIN™** from OP/TECH USA offers protection for a rifle in all situations. Its unique neoprene design allows the rifle to be carried on the shoulder into the field, shielding it from dirt and moisture. There is a section to accommodate a scope on the top while snap closures on the bottom give instant access to the rifle. The barrel compartment is lined with a polyethylene foam pad for added protection of the barrel and front sight.

The **RIFLE NEO SKIN™** is compatible with gun racks at home, in a vehicle or a 4-wheeler or while riding a horse so it's easier than ever to take a firearm into the field.

The rifle's barrel is placed into the barrel compartment. The pouch is then stretched over the scope/rifle and secured over the rifle's butt end. The five snaps securely close the underside while keeping the rifle's strap connectors accessible for use. This means that you can use the **RIFLE NEO SKIN™** with any strap or sling, including OP/TECH USA's **ACTION SLING™** and **PERFORMANCE SLING™** series of ultra-comfortable slings for rifles. The **RIFLE NEO SKIN™** is proudly made in the U.S.A.

OP/TECH USA continues to innovate quality products to meet the ever-changing needs of the avid outdoor enthusiast. If you need more information about our products, please call 800-251-7815, e-mail info@optechusa.com or visit us online at www.optechusa.com.

Foam-lined compartment protects barrel and front sight

Slips over a mounted scope

Stretches over the butt of the rifle for a secure fit

Snap closures on the underside secure the pouch without interfering with a rifle sling
