PRESS RELEASE
FOR IMMEDIATE RELEASE

Scope Skin™

*Neoprene **SCOPE SKIN™** Offers Ideal Protection from Impact and Exposure*

Whether outside in harsh elements or stored away for next season, OP/TECH USA's **SCOPE SKIN™** is required equipment for protecting your scope's precise optics. We chose neoprene material because it offers ideal impact protection and shields your scope from dust and moisture. Having optics covered by dirt or water definitely gives the advantage to your prey. We'd like to make sure that you have every advantage for success. It's another reason that we use neoprene in the design as it can be easily and quietly removed. Merely stretch it on and off your scope without a sound. There are no buckles, zippers or hardware which can inadvertently make noise. Neoprene **SCOPE SKIN™** helps ensure the best possible chance of success while hunting. Add one to your essential gear.

SCOPE SKIN™ is available in three sizes (Small: 8"-10" up to 40mm objective, Medium: 10.5"-12.5" up to 50mm objective, Large: 13"-15" up to 54mm objective). Select the **SCOPE SKIN™** that's right for you. They are 100% made in the U.S.A. and carry a lifetime warranty against manufacturer defects. **SCOPE SKIN™** is available in black and nature.

OP/TECH USA continues to innovate quality products to meet the ever-changing needs of the avid photographer and outdoor enthusiast. We feel you deserve the very best! For more information about our products, please call 800-251-7815, e-mail info@optechusa.com or visit us online at www.optechusa.com.
