PRESS RELEASE
FOR IMMEDIATE RELEASE

Can be worn on either shoulder

Camera can be cinched close to the body for added security

Super Classic Sling™

*The **SUPER CLASSIC SLING™** is perfect for full-frame mirrorless & SLR cameras!*

OP/TECH USA's **SUPER CLASSIC SLING™** is a streamlined sling-style strap for mirrorless and SLR cameras using heavy lenses. The cameras may be getting smaller, but the lenses are still packing on the weight. The **SUPER CLASSIC SLING™** offers the best of both worlds... compact design with added reinforcement and support to handle extra weight.

As many photographers prefer to keep the attachment on the camera as short as possible, OP/TECH USA's Uni-Loop™ Connectors fit the bill perfectly. They secure easily on the camera and glide smoothly up and down the sling for rapid access to the camera. As the Uni-Loop™ Connectors attach to the normal connection area on a camera, there's no need to give up the tripod mount. This keeps the gear in a more accessible position instead of hanging upside down which can put more torque and pressure on the camera housing and lens mount area. Most cameras will attach with a single Uni-Loop™ connector (rated at over 146 lbs.); however, cameras with a second attachment point on the right side, or cameras with battery grips can use two. An adjustable "stop" lets the photographer configure the position where the camera hangs best. The quick disconnects allow one to change from a sling configuration to a more conventional neck/shoulder strap by simply attaching OP/TECH USA's Extension System Connectors (sold separately). This makes the strap extremely versatile so that it changes along with the photographer's needs.

The comfortable neoprene pad features a non-skid surface backing which really grips to the shoulder. It can be worn on either the left or right shoulder which increases its versatility over most other slings on the market. The internal control-stretch system combined with a comfort-stretch binding assures a durable strap that offers maximum comfort and support.

The quick adjust feature allows the length to be instantly shortened or lengthened as desired. This is great for hiking through dense brush or navigating large crowds as the camera can be cinched up close to the body for added security. To return the sling to its regular size, all that is needed is to lift the upper connector with a single finger and pull the camera down into shooting position. It's that easy!

The **SUPER CLASSIC SLING™** is adjustable from approximately 25" - 36" (63,5 - 91,4 cm) and is available in black or nature. It's proudly made 100% in the USA.

OP/TECH USA continues to innovate quality products to meet the ever-changing needs of the avid photographer and outdoor enthusiast. We proudly make our products in the USA using top-quality materials as we feel you deserve the very best!
