PRESS RELEASE

FOR IMMEDIATE RELEASE

**GIMME GRIP STRAP™**

***GIMME GRIP STRAP™*** — *A hand strap that allows for more freedom of movement!*

OP/TECH USA's **GIMME GRIP STRAP™** is the accessory that active photographers have been waiting for. As many photographers are using quick-release plates to go from a handheld position to tripod shooting in an instant, the **GIMME GRIP STRAP™** is an ideal solution. It uses a Uni-Loop Connector to attach easily to many brands of quick-release plates that offer a strap connection area. If the camera itself has an extra attachment area located on the grip, then a quick-release plate is not needed at all to attach the lower part of the **GIMME GRIP STRAP™**.

The **GIMME GRIP STRAP™** also attaches to the normal strap attachment area on the upper part of the camera to give added stability. For this attachment area we offer two options: regular fit (Uni-Loop Connector) and tight/short fit (Special attachment system) for smaller hands. Both options are fully compatible with most OP/TECH USA neck straps, wrist straps and harnesses! This versatility gives photographers the freedom to switch to their preferred shooting setup in just seconds.

The **GIMME GRIP STRAP™** has a 3-position adjustable elastic wrist strap that offers a secure grip without compromising the ability to easily access all camera and view screen controls or shooting positions. Its comfortable fit and design offers the assurance against dropping expensive gear without the feeling of being chained to it!

The **GIMME GRIP STRAP™** is proudly made in the USA and available only from OP/TECH USA!

OP/TECH USA continues to innovate quality products to meet the ever-changing needs of the avid photographer and outdoor enthusiast. We proudly make our products in the USA using top-quality materials as we feel you deserve the very best!
