Keep your accessories handy with the System Connector™-Magnetic QD

PRESS RELEASE
FOR IMMEDIATE RELEASE

SYSTEM CONNECTOR™ – MAGNETIC QD - *The handy way to keep your camera accessories at the ready!*

OP/TECH USA's **SYSTEM CONNECTOR™ – MAGNETIC QD** is the perfect solution for photographers who want to keep a lens cap or other accessory readily at hand. It easily connects into our 3/4" quick disconnect located on many OP/TECH USA straps and harnesses. It's a snap to install....no pun intended! The rugged quick disconnect easily snaps between the strap pad and main strap. It offers a strong nickel-plated rare-earth magnet (stronger than regular magnets) to securely hold your equipment. It comes with three mating magnets with a self-adhesive side that can be applied to lens caps, lens mount caps, loupes, electronic viewfinders, small flash units or whatever else you might want to keep ready for immediate retrieval. Since the hold is magnetic, the **SYSTEM CONNECTOR™ –MAGNETIC QD** is ideal for use while wearing gloves in inclement weather; no more fumbling with latches or lanyards! Add one to your OP/TECH USA strap today and never misplace your lens cap again!

OP/TECH USA continues to innovate quality products to meet the ever-changing needs of the avid photographer and outdoor enthusiast. We feel you deserve the very best! For more information about our products, please call 800-251-7815, e-mail info@optechusa.com or visit us online at www.optechusa.com.
