PRESS RELEASE
FOR IMMEDIATE RELEASE

Add stability and extra security to OP/TECH USA straps and harnesses with the System Connector™ – Sternum/Under Arm Adaptor

SYSTEM CONNECTOR™ – STERNUM/UNDER ARM ADAPTOR adds stability to straps and harnesses!

The **SYSTEM CONNECTOR™ – STERNUM/UNDER ARM ADAPTOR** is the latest addition to the family of OP/TECH USA System Connectors™. The quick-attach triglides thread easily onto an OP/TECH USA Double Sling™ (shown above left) for those photographers wanting a chest strap for added stability and security. It's also great when hiking as an added assurance to keep the harness firmly in place on your shoulders.

It can also be used with an OP/TECH USA Utility Strap™ – Sling (shown above right) or Super Classic Sling™ to further secure your gear under the arm. To maximize freedom of movement with the camera, it is usually recommended to fasten the sling's Uni-Loop™ Connector to an OP/TECH USA Quick-Release Plate (sold separately). This gives a bit of added length to the connection area so that you can get into shooting position without interfering with the **SYSTEM CONNECTOR™ – STERNUM/UNDER ARM ADAPTOR**.

The **SYSTEM CONNECTOR™ – STERNUM/UNDER ARM ADAPTOR** is fully adjustable from 9.5" - 18.5" (24,1 - 47cm) long, so it's sure to fit most body types. With just a little imagination, the **SYSTEM CONNECTOR™ – STERNUM/UNDER ARM ADAPTOR** can become the must-have accessory for any application. Get one today to see how much easier it can be to carry your gear!

OP/TECH USA continues to innovate quality products to meet the ever-changing needs of the avid photographer and outdoor enthusiast. We feel you deserve the very best! For more information about our products, please call 800-251-7815, e-mail info@optechusa.com or visit us online at www.optechusa.com.
