

As an approved supplier to the world's largest distributors, CIWO TECH realizes the importance of having the best designs for increasing employee safety and productivity. We proudly manufacture a wide assortment of slings, straps, and harnesses for hand-held devices used in warehouse, distribution, and fulfillment centers.

Our focus is Protection, Productivity and Performance!

APPLYING MINI QD LOOP CONNECTORS

STEP 1

Thread the small cord of the **Mini QD Loop Connector** through your device's strap connection area. If the connection area is tight, use a piece of dental floss or similar to pull the loop through.

STEP 2

Pull enough of the loop through the device's connection area to allow you to pass the plastic connector through the cord loop.

STEP 3

Pull the plastic connector to tighten the knot. Repeat steps 1 - 3 for any additional strap connection areas as needed. The **Mini QD Loop Connectors** are now ready to connect to your CIWOTEch wearable strap, sling or harness. Because the **Mini QD Loops Connectors** are universal to the CIWOTEch product line, you can move your device from one wearable to another in just a few seconds.
