

NEW SIZE! SOFT POUCH™-DIGITAL D-SERIES

D-MIDSIZE OS

Fits lenses 4" - 5.5" long and up to 4"Ø Envoy Strap™ & Hood Hat™ available separately

- Soft, durable neoprene pouch is ideal for most full-frame mirrorless cameras using larger lenses
- Protects camera and lens while in the field or in storage
- Can be used in conjunction with a neck strap
- Nonmarring snaps securely close the flap cover

Introducing our newest addition to the **SOFT POUCH™-DIGITAL D-SERIES!** The **D-Midsize OS** (Oversize) is perfect for the newest full-frame mirrorless cameras using today's most popular larger lenses. It's designed to fit lenses from 4" - 5.5" (10,2-14cm) l x up to 4" (10,2cm) Ø. See the chart below for a partial listing of cameras. If you don't see your camera listed, visit our website's **PRODUCT FINDER** to find the pouch that's best for your gear!

NEW SIZE! FOLD-OVER POUCH™

New shape fits most adaptors with tripod mount

Integrated cap simply folds over to close

- New unique shape accommodates most adaptors with tripod mounts
- Soft, durable neoprene protects adaptors against dust, moisture and impact
- Attached lid contains no marring hardware and offers added convenience and easy access

The new **FOLD-OVER POUCH™-282** from OP/TECH USA adds even more convenience for carrying lens adaptors with tripod mounts. The unique shape accommodates these adaptors using the same materials and design features that have made the **FOLD-OVER POUCH™** so popular over the years.

It's made from rugged, yet soft neoprene to provide exceptional cushioning for delicate equipment. It's also very convenient to use. Simply grasp the lid portion and turn it inside out for instant access to the pouch's interior. Once your adaptor is nestled safely within, just turn the lid right-side-out once more and you're set to go!

Don't forget the other nine sizes of **FOLD-OVER POUCH™**! You're sure to find one to fit your most popular lenses – from the smaller pancake lenses to lenses measuring up to 6.5" (16,5cm) long!

Give the **FOLD-OVER POUCH™-282** a try today!

FOLD-OVER POUCH™-282

Stock #	Description	Approx. Size* (Base Ø x L)	Color

NEW! GRASP-IT™

Strap available separately

Fits lenses up to 4"Ø

- Functions as a third hand to hold a camera at the side
- Use with a sling or shoulder strap for hands-free convenience
- Soft, durable neoprene snugly secures the camera without marring the finish
- Attaches to most any belt
- Belt loop slot is available to keep the GRASP-IT™ from sliding on belt

Combine the **GRASP-IT™** with a belt and a shoulder strap/sling and it's like having a third hand to keep a camera firmly in place at the hip. It's the ideal solution for keeping the camera from bouncing around between shots. A belt loop option keeps the **GRASP-IT™** from sliding on the belt. Simply place the lens [up to 4" (10 cm) diameter] through the opening and the camera rests comfortably on the **GRASP-IT™**. When not in use, it hangs flat at the side. The soft neoprene is comfortable to wear and won't scratch the camera's finish. It conveniently holds the camera when both hands are needed for other tasks, yet it remains immediately available at all times. Discover the freedom of the **GRASP-IT™**!

GRASP-IT™			
Stock #	Description	Approx. Size (flat)	Color
5301112	Grasp-It™	5" x 8.25" (12,7 x 21cm)	Black

NEW SIZE! DOUBLE SLING™

- Slings two cameras comfortably and securely
- Unique neoprene pad design evenly disperses the weight and balances the gear at one's sides
- Easy to attach and fully adjustable
- Interchangeable design enables the user to convert from a dual to a single sling system or to quickly move a camera to another OP/TECH USA strap

The **DOUBLE SLING™** from OP/TECH USA offers the same feel and fast action of the **UTILITY STRAP™-SLING...** times two! Its U-shaped neoprene pad effectively distributes and balances the weight of two cameras while absorbing the shock of the photographer's movements. The cameras glide up and down the strap with unparalleled ease and speed so photographers not only stay comfortable, they'll never miss a shot due to a tangled strap.

Using OP/TECH USA's exclusive **UNI-LOOP™ CONNECTORS** to attach the cameras, the tripod socket remains available. The strap also has added flexibility in that it can be adjusted to carry only one camera if desired. By simply adjusting one of the slings snugly under the arm, the U-shaped pad remains stable on the shoulders.

The **SLING STRAP ADAPTOR SYSTEM CONNECTOR™** used on the **DOUBLE SLING™** can be removed from the U-shaped pad and added to most other OP/TECH USA standard strap pads to create an over-the-shoulder sling strap. This interchangeable design gives the photographer flexibility to customize their gear to fit their ever-changing needs. Comfort, security and flexibility sum up the features of the **DOUBLE SLING™**. Give it a try!
